Mac Product Range

iSky

The iSky widget allows you to control a Sky Digibox satellite TV receiver from your Mac. Just drag your mouse to a screen corner and the iSky keypad appears on your Mac. The usual Sky infra red remote buttons appear and you can select all the sky menus and channels. iSky is supplied with an USB to infra-red adapter. Use iSky to convert your Mac and your existing Sky Digibox into a smart Sky+ PVR. Recordings will be saved on your hard disk and can be copied on DVDs using iLife. iSky is the perfect add-on for any Mac based entertainment system. It will replace your existing remote controls and can be configured to drive your complete home cinema system.

Apple TV

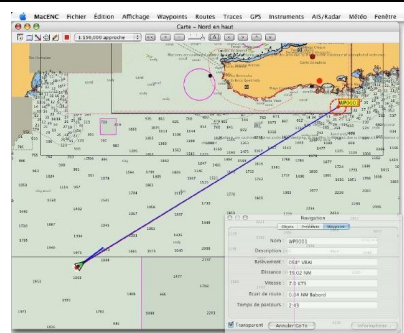

Our iSky entertainment system has been upgraded and now offers the following features :

- iPod touch and iPhone remote control
- Lossless music storage (not MP3)
- satellite TV over LAN
- Apple TV compatible
- Stewardess call

mac ENC

Use macENC navigation software to entertain your guest and give them a chance to use their own chart plotter. Install this software on a mac in the main salon and let the guests explore the charts. MacENC™ is integrated in the iSky media player. Connect a GPS receiver to you wifi network and watch as your vessel moves along in real-time, plotting a track behind and logging a historic position on a seamless digital chart.

3G

Packed with new and unique features, the mac friendly 3G GlobeSurfer router pushes the boundaries of conventional gateway routers. This clever device offers HSUPA at 5.76Mbps and HSDPA at 7.2Mbps, as well as AWS support – making it a forerunner in the bandwidth market.

The GlobeSurfer III is easy to use too, with just two buttons and a clear, color display screen, while unique Notifier software displays alerts and status information across the wireless network.
