

DECEMBER PRODUCTS HIGHLIGHTS

Fire Alarm

The ATHENA fire detection panel is a compact approved system for superyachts. This alarm system and its detectors are approved by the main maritime classification societies. The alarm panel can visualize the exact position where a fire is starting or identify a detector failure. This function is particularly applicable to ships with many zones such as guests cabins and crew premises. Contact us to upgrade your existing system

CCTV Touchscreen

Upgrade your old CCTV network with a new touchscreen system. We can convert your analog camera to a full IP system. This features multiple workstations, motion detection, smart video recording, PTZ cameras and interface to ship's general alarm system. We can also connect your CCTV system to your UHF radios to send alarms directly to your handheld radios.

VSAT Airtime

Fed up with you VSAT provider ? 360 can now offer the following VSAT contracts :

- Short term, no-commitment contracts (1,3, 6 months zero penalty), stop paying for a service you don't use, switch to 3G for the winter!
- Bandwidth on demand for special events (ie. one day video conferencing, 2 hours TV streaming).
- Dedicated bandwidth (1:1 ratio) for heavy internet users (even for short periods).
- Our standard package features a contention ratio of 5:1.
- TwinLink total redundancy option. Cost effective solution for yachts with 2 VSAT antennas.
- Combined contract with 3G Internet for the Winter and VSAT for the Summer.
- Coverage : dual satellite operation for the entire Mediterranean area with excellent elevation-angles in the most important cruising areas. No more mast shadows.
